

The PROTEAN® Water Barrier platform provides options for the pulp, paper and packaging industries to replace environmentally persistent water barriers, such as plastic coatings and petroleum derived sizings, with eco-friendly alternatives. Our proprietary wet end additive and coating formulas become interlaced in the paper matrix, lending impressive strength properties and can be used as a wet-end additive or barrier coating solution. PROTEAN Water is biodegradable as it is 100% biobased.

The solutions are efficient and cost-effective alternatives for manufacturers looking to support their sustainability claims. HSMG® has acquired significant expertise related to the use of PROTEAN and will work with clients to tailor coating formulations to address a full range of barrier requirements.

When compared to legacy technologies, PROTEAN Water Barrier can offer the following benefits:

SUSTAINABILITY:

- Made from natural, renewable resources
- Paper is repulpable and recyclable
- 100% biodegradable and compostable formulations available
- Free of wax and silicone
- Does not require special conditions for end of life disposal

MANUFACTURING EFFICIENCY:

- Scalable and adaptable using existing mill equipment
- Can be applied using curtain coating, size press, rod or blade coating equipment
- Offers an excellent surface for printability
- Maintains fiber flexibility for converting

VERSATILITY:

- Compatible with other barrier systems such as OGR, oxygen, water vapor
- Suitable for hot or cold products
- Compatible with bleached or unbleached papers
- Can be applied on one or both sides of paper
- Coating can be applied before or after printing
- Available as a full or a spot application

SAFETY:

- FDA approved under 21 CFR 172.867
- Meets specifications described in Generally Recognized as Safe (GRAS) notices GRN 227 and 325
- BFR XXXVI & XXXVI/2
- Non-toxic

PROTEAN Water Barrier can be used for several paper and paperboard applications including:

PAPER-MULCH

Low cost coating to provide superior water-resistance and paper strength. This is a new generation of paper-mulch that won't degrade as quickly.

DISPOSABLE COFFEE CUPS

These are plastic-free paper cups using PROTEAN™ Water Barrier coating to provide high water-resistance instead of plastic-film and can be recycled without segregation.

GROCERY BAGS

A perfect solution to replace plastic bags with stronger, more durable paper bags enhanced by our coating. They are reusable and tough enough to handle blustery weather conditions.

PAPER STRAWS

Improves the consumer experience as straws will withstand being submerged in liquid for a longer period with enhanced water-resistance qualities. Also allows manufacturers to use less raw materials, without compromising performance.

OIL ABSORBENTS

Safe, efficient oil-loving technology that is an economical alternative to existing oil-spill management solutions. The oil can be quickly recovered, and the oil sponge can easily be reused several times.
